PREM HARI S

Full Stack Developer | MERN Stack | B.Sc. Computer Technology

haripradeep185@gmail.com | 6383270437 | Coimbatore, Tamil Nadu | github.com/Premhari-7 | linkedin.com/in/premhari07

PROFESSIONAL SUMMARY

Motivated and self-driven Full Stack Developer with hands-on experience building production-ready, real-time web applications. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js), PHP, MySQL, and Bootstrap. Experienced in multi-technology projects with strict architectural requirements including AJAX-only communication, prepared SQL statements, and SVG-based UI design. Holds certifications in Google UX Design and Google AI Essentials. JLPT N5 Japanese certified. Actively seeking opportunities to contribute to impactful Web development teams.

EDUCATION

B.Sc. Computer Technology
2024 – 2027 (IInd Year) | CGPA: 8.4
Sri Krishna Arts and Science College, Coimbatore

TECHNICAL SKILLS

Languages: JavaScript (ES6+), PHP, Python, HTML5, CSS3
Frameworks: React.js, Node.js, Express.js, jQuery, Bootstrap
Databases: MongoDB, MySQL, XAMPP
Tools & Design: Git, GitHub, VS Code, Postman, Figma (Basics)

PROJECTS

User Auth System | PHP, jQuery, MySQL, MongoDB, Bootstrap | github.com/Premhari-7/guvi-project ↗

- Built Login, Register, and Home pages with dual-database architecture — MySQL (Prepared Statements) for user registration data and MongoDB for user profile details.
- Implemented jQuery AJAX for all backend communication with strict multi-file code separation (HTML, CSS, JS, PHP in separate files) and SVG-only icons as per GUVI task specifications.

Scent Bite — Perfume Shop Management | JavaScript, HTML5/CSS3, Node.js, MySQL | github.com/Premhari-7/scent-bite ↗

- Built a real-time web app with , user profiles, and a smooth booking confirmation flow.
- Designed a fully responsive UI with seamless experience across desktop and mobile using CSS, HTML5.

Smart Parking System | JavaScript, HTML5/CSS3, Node.js, MySQL | github.com/Premhari-7/smart-parking-system ↗

- Developed a smart parking management system featuring real-time slot monitoring, vehicle entry/exit tracking, and automated booking flow.

Plant Disease Analyzer (AI-Powered) | Python, Machine Learning, HTML5/CSS3, REST API | github.com/Premhari-7/plant-disease-analyzer-ai ↗

- Developed an AI tool that analyzes uploaded leaf images and identifies plant diseases in real time using trained ML models with confidence scores.
- Integrated a REST API backend to process image uploads and return diagnostic results, with a clean and responsive frontend interface.

CERTIFICATIONS & ACHIEVEMENTS

- Google UX Design Professional Certificate — Coursera
- Google AI Essentials Specialisation — Coursera
- JLPT N5 Certified — Japanese Language Proficiency Test
- NPTEL Silver Rank — Plastic Waste Management
